

We ARE Preston Manor
Ambition | Responsibility | Excellence

Temperate climate

Temperate climate has some hot weather and some cold weather. Places such as the UK experience temperate climates. There is usually high rainfall closer to the sea. Temperate climates cycle through all four seasons: winter, spring, summer and autumn.

Savanna climate

There are two seasons: dry (winter) and wet (summer) on the African Savanna. The dry season is long, lasting from October through to March. The Savanna is extremely rich in grass and tree life, which makes it attractive to large herbivores such as giraffes and elephants.

For your project, can you design poster, fact-file or model of any of these aspects of our learning: Deserts, forests, beach, vegetation and animals that live in these different climates. Kindly ask your parents for help. Bring these projects on the first day back after the half term break. The best project will win a prize!
