History - Past and Present [Houses]

Our topic in History will be to compare houses from the past and present. We will be looking at how houses have changed and why they changed over time.

Stone Age houses

These people built temporary homes from wood and animal skins. Stone Age people were hunter-gatherers, who had to catch or find everything they ate. They moved from place to place in search of food.

Bronze Age houses

Bronze Age people lived in simple wooden homes. They built simple farms, where people lived in the same room as their animals for warmth and to protect them.

The Tower of London

The castle was built by William the Conqueror in the Norman Age and it was made out of white stone. It showed the people how important and how rich he was. It was the tallest building in Britain at the time.

Home Learning

For your project, design a wooden house or a castle to show how people lived in the past or present. You can use materials such as cardboard, sticks and grass to make your house. If you can't make a house, you can draw or write some facts about it. Kindly ask your parents for help. Bring these projects on the first day back from the half term break. The best project will win a prize.
